Education

Aalto University

BSc. (Tech) in Computer Science. GPA 4.95 / 5, 165/180 ECTS.

Aug 2022 - Jun 2025

Espoo, Finland

Nanyang Technological University

Exchange studies

Aug 2023 - Dec 2023

Singapore, Singapore

Experience

CERN

Incoming OpenLab Summer Intern

Jun 2025 - Aug 2025

Geneva, Switzerland

- Project topic: Optimising Multi-Cluster Kubernetes for Active-Active Deployments Across Public and On-Premise Data Centers

Amazon

Business Analyst Intern

May 2024 - Aug 2024

Luxembourg, Luxembourg

- Data pipeline source database migration and runtime optimization with Python, parallelism, SQL and AWS. Improved pipeline runtime by 85%.
- Research and software development on Retrieval Augmented Generation (RAG) with Python and AWS, deployed a RAG chatbot for my team. Optimized RAG parameters and prompts.

Nokia

DevOps Engineering Intern

Nov 2022 - Aug 2023

Espoo, Finland

- Developing data science development environments with technologies such as Kubernetes, Python, Bash, CI/CD, Docker and Helm.
- Researching graph visualization libraries and developing them with JavaScript, Node.js, React. Lead for 6-person intern team.

Avanio

Junior Software Developer

Jan 2022 - Aug 2022

Salo, Finland

- Developing web apps with JavaScript, Node.js, React, and MongoDB. Infrastructure and DevOps with Microsoft Azure, Docker and CI/CD.

Finnish Defence Forces

Conscript

Jul 2021 - Dec 2021

Niinisalo, Finland

- 6-month military service in reconnaissance unit.

Projects

Efficient Indexing for Regular Path Queries in Graph Databases | B. Sc. Thesis

Nov 2023 -

- The thesis explores different indexing techniques for regular path queries in graphs in order to reduce the runtime of such queries.

Autonomous Drone | C++, ROS, Computer Vision

Sep 2024 -

- Building a self-driving and object-detecting drone with Nvidia Jetson and Pixhawk, C++, Python, Robot Operating System, and computer vision modules. Part of 8-person team in the software project -course. (ongoing)
<https://github.com/CatScanners>

InvShare - Investment platform web app | TypeScript, React, Node.js, GraphQL, MongoDB, GraphQL November 2021

- Mock social investment platform web app implemented with authenticated user profiles and follower-structure, intuitive stock ticker charts, usage of many financial APIs. <https://github.com/olligorioso/InvShare>

Technical Skills

Languages: Python, TypeScript, Scala, C++, SQL, Bash

Developer Tools: Azure, AWS, GCP, GitHub, Linux/Unix, Robot Operating System (ROS)

Technologies/Frameworks: Docker, Kubernetes, React, Node.js, CI/CD, GraphQL, MongoDB, PostgreSQL, MySQL, TCP/IP

Relevant coursework: Computer Graphics, Advanced Computer Graphics (ongoing), Machine Learning, Artificial Intelligence (ongoing), Operating Systems, Databases, Data Structures and Algorithms, Information Security, Computer Networks, Full Stack Open

Other

Certifications: Azure Fundamentals (Jan 2022) — Azure Developer Associate (Feb 2022 - Feb 2026) — Azure DevOps Engineer Expert (Mar 2022 - Mar 2026) — Azure Solutions Architect Expert (Mar 2022 - Mar 2026) — Azure Administrator Associate (Mar 2022 - Mar 2026) — Azure Data Scientist Associate (Apr 2022 - Apr 2026)

Languages: Finnish native — English fluent — German intermediate

Extracurricular: MIRAI Japan 2024 participant — Aalto-Volley IT responsible & team member — Solve the SDGs Hackathon 2023 participant — Junction Hackathon 2022 participant — Huawei Seeds For The Future 2022 participant
